

**STUDIO TECNICO PERITALE**

A.C. Expert operates in the following fields of logistics:

Sea

Land

Railway

## 360° COVERAGE

Technical expert studio "A.C. Expert S.R.L." was born in 2008 through the initiative of Dr. Alberto Cedolini, who founded the company after many years of experience in the field of logistics.

Our company operates in the field of **goods and cargo transportation** where we cover every aspect of the process. This includes solving all the various problems that come with transporting goods and cargo involving vehicles of all variations.

We offer our services and expert advice to a wide range of clients, including: Insurance agencies, broker Insurance, shippers and manufacturers, logistics enterprises, importers and exporters, and traders, in addition to that of carriers, senders and addressees/receivers (concerning survey and risk management - RCV, RCA, kasko vehicles, RCT/RCO, etc).

The corporate structure is composed of **expert and reliable professionals** who work within full respect of the rules and regulations of the National Transport (D.D.T.), Communitarian (C.M.R.), International (Bill of Lading, Airwaybill, etc).

Air

Multimodal

## Types of transport

A.C. Expert operates within national and international markets, with a vast knowledge of the operation and transportation of goods vehicles along with all the various problems and issues one can encounter. We deal with cargo:

- by sea
- by land
- by rail
- by air
- multimodal transports

## Types of cargo

A.C. Expert particularly operates on:

- Goods and cargo, bagged or in bulk, industrial machinery, industrial vehicles
- Goods transported in containers
- Dry bulk cargo- organic and inorganic, seeds, grain, flour, feedstuff and natural food products; metallurgical products, i.e.: raw materials (scrap, cast iron, direct reduced iron, etc.), pre-finished (coils, round bars, plates, etc.) or finished (carpentry, etc.)
- Salt, fertilisers, sand, alumina and other general industrial raw materials
- Man made products, metallic and construction materials- Cement, round bars etc.
- Lumber (logs), pre-finished (boards, plywood, etc.) and finished (furniture, parquet, etc.)
- Foodstuffs, fresh, refrigerated, chilled, deep frozen food and vegetable products

**Flexible Solution  
for Every Need**

## Know how / experience

Throughout the years our services have been extended, offering technical advices either on various goods or on their means of transport (sea and land). We offer advice, survey reports, a controlled estimate and evaluation to every client.

Besides the relative cover to the transportation of the goods, the studies are carried out on problematic issues such as the production of the goods, working to the **Product Liability**.

As such A.C. Expert is in a position to resolve, with **one interlocutor**, any problem you may have about the intervention on a transport damage which involves either the transported goods or the vehicles, as it happens.

This is particularly beneficial to the insurer/commissioner along with the holders of the insurance agreement.

## Areas of activity

A.C. Expert covers the entire North-East area of Italy, with availability on request, even outside of our coverage area if required.

For areas not in our coverage zone we offer the services of fellow national and international collaborators with whom we have an existing professional relationship.

We as a studio also carry out our own activities in the **international field**, with multilingual staff always on hand to deal with any situation. We also provide direct contact with our staff who is free to discuss any services and working relationships in the main international languages: English, German and French.

In cases of particular damages, where a prompt intervention resulted as decisive, we are in a position to intervene in the requested site within a **limited timescale**. Offering our management in site, we can effectively deal the damage, allowing to solve problems quickly and thoroughly.

# Company structure

A.C. Expert staff is member of the **Insurance Surveyors National Association**, so in a position to cover all damages and events caused during transports, as requested by Italian legislation.

We have **specialized expert** collaborators in:

- Cargo damage evaluation within air, land and sea transportation (on ships, trains, motor vehicles, containers, etc)
- Evaluation and quantification of damages / quotes on the vehicles, with specialisation in industrial vehicles, top cars and boats
- Locating the source and cause of damage incurred to transported cargo
- Compatibility of damages and dynamics of the situation
- Loss Prevention- full checks and inspections to the loading/unloading (Pre-Loading/Pre-Discharging Survey), stowing and lashing of goods
- Weight checks and Draft Survey
- Samplings
- Providing -holds cleanliness certificate; suitability of warehouse storage, containers, trucks, train carriage
- Certification in sealing and unsealing
- Estimate on production damages (product liability)
- Issuing of Insurance technical advices / survey reports
- Claims management
